

Dear FCC:

I **must** object to the proposal to make cable channels available individually.

Initially, it looks like this would make sense to the consumer: Only pay for what you get.

But, on second thought, this proposal leads to the "dictatorship of the proletariat"!

Less popular channels will not survive. But those are the channels I watch most. So I will end up being forced to watch what the majority of (uneducated) Americans choose to watch!

This is really a question of the majority preference (the great unwashed masses) vs. the preferences of the educated few.

Are we to be disenfranchised because of the majority will? This is **never** what the Founding Fathers had in mind! No single group should dictate its will to the remaining minorities.

Please do not approve "a la carte cable" as it is proposed.

Thank you,

William R. King
